**LATEST SOCIOLOGY BOOKS
FREEDOM AND CONTROL IN MODERN SOCIETY**

Edited by **MORROE BERGER**, Princeton University; **THEODORE ABEL**, Hunter College; and **CHARLES H. PAGE**, Smith College.

From the introduction—"These essays have three things in common. They deal with important social and political problems of contemporary life; they have been written by scholars who admire Robert M. MacIver and, as his students or colleagues have learned from him; and they deal with those subjects of social science that have interested MacIver and which he has illuminated in his books and articles for more than three decades." The editors and contributors have arranged these essays to interest the non-specialist who seeks to understand what is happening in the world, the student who seeks not only knowledge of social life but intellectual stimulation, and the specialist and teacher who will be attracted by the quality of these essays as well as by their adaptability to the classroom.

**New SECOND EDITION
JUVENILE DELINQUENCY IN MODERN SOCIETY**

by **MARTIN H. NEUMEYER**, University of Southern California

This new edition maintains the same excellent approach which distinguished the first, but is an extensive revision and expansion of the original work. In this revision the primary changes are in the content. The material is organized more systematically and has been brought up-to-date; the analysis of data is improved, made possible by current statistics and recent research in the field; and the materials have been drawn from a wider range of sources. In the analysis of the causes of delinquency, the book stresses both personality and social environment factors.

SOCIAL PROBLEMS AND THE CHANGING SOCIETY

by **MARTIN H. NEUMEYER**, University of Southern California

An understanding of the social order in which we live necessitates a knowledge of current social problems—their nature, extent, conditioning factors, social consequences, and control.

It is the aim of this book to describe typical present-day problems in the setting of American democracy. The material of this new text is divided into three parts: (1) the changing contemporary society; (2) typical contemporary social problems; and (3) social control and planning. The book provides enough factual information to serve as the basis of objective thinking, yet is not overburdened with statistical data.
