NOTICE TO CONTRIBUTORS
Revised February 2014

Manuscript Submission

Manuscript Submission Format: Manuscripts should meet the format guidelines specified in the Notice to Contributors published in the February and August issues of each volume. All text must be double-spaced and typed in Times New Roman, 12-point font size. Margins should be at least 1 inch on all four sides. You may cite your own work, but do not use wording that identifies you as the author.

Submission Requirements: Manuscripts submitted to ASR are processed electronically through SAGE Track. Authors can create an account and log in to submit a manuscript at http://mc.manuscriptcentral.com/asr. As part of the blind peer review process, authors will need to upload a blinded manuscript without a title page, as well as a separate title page with the authors’ institutional affiliations, acknowledgments, and contact information for the corresponding author. SAGE Track will ask authors to recommend specific reviewers (or identify individuals ASR should not use). Do not recommend colleagues, collaborators, or friends. ASR may choose to disregard these recommendations.

Authors will need to upload the following separate files/items into SAGE Track:
• Cover Letter. Please provide complete contact information for the corresponding author (name, address, phone/ fax, e-mail), the complete manuscript title, and any other important and relevant information.
• Abstract. Please upload an abstract of 200 words or fewer describing the purpose, methods, and general findings of the study.
• Title Page. Please include authors’ institutional affiliations, acknowledgments, and contact information for the corresponding author.
• Blinded Manuscript. Blinded manuscripts do not include the title page (or any self identifying information, see below). There is no need to include the abstract with the blinded manuscript.
• Biography Page. Please provide a short biography (fewer than 100 words) for each author. See previous issues for examples.
• $25.00 Non-refundable Manuscript Processing Fee. Authors must pay the non-refundable $25.00 manuscript processing fee electronically through SAGE Track. All new manuscripts require a fee unless authored by ASA student members.

Address for Correspondence: American Sociological Review, Vanderbilt University, PMB 351803, 2301 Vanderbilt Place, Nashville, TN 37235; Phone: (615) 343-0426; Fax: (615) 343-0068; E-mail: ASR@vanderbilt.edu

MANUSCRIPT PREPARATION

All pages must be double-spaced (including notes and references) with margins measuring at least 1 inch (i.e., line length must not exceed 6 1/2 inches). Please use 12-point Times New Roman font. We generally prefer that ASR Articles not exceed 15,000 words in length including abstract, text, references, and notes (excluding tables and figures).

ASR Comments/Replies should not exceed 3,000 words. Upload Comments and Replies directly into SAGE Track; ASR does not require that Comments first be sent to article authors.

Sections in a manuscript may include the following: (1) Title page, (2) Abstract, (3) Text, (4) Notes, (5) References, (6) Tables, (7) Figures, and (8) Appendixes.

1. Title page. Please include the following:
   • Full article title
   • Each author’s complete name and institutional affiliation(s)
   • Key words (four or five)
   • Acknowledgments and credits
   • Grant numbers and/or funding information
   • Corresponding author (name, address, phone/fax, e-mail)
2. Abstract. The abstract (150 to 200 words) should not include authors’ names or other identifying information.
3. Blinded Manuscript. The manuscript should not include the title page, authors’ names or affiliations, or any other identifying information. ASR uses anonymous peer reviewers for manuscript evaluation. Delete or rewrite any text that identifies you as the author: when citing your own work, please write “Smith (1992) concluded . . . .” but do not write “I concluded (Smith 1992). . . .”
   a) Headings and subheadings. Generally, three heading levels are sufficient to organize text. See recent issues for examples.
   b) Citations in the text should provide the last name of the author(s) and year of publication. Include page numbers for direct quotes or specific passages. Cite only those works needed to provide evidence for your assertions and to refer to important sources on the topic. In the following examples of text citations, ellipses ( . . . ) indicate manuscript text:
      • When author’s name is in the text, follow it with the year in parentheses— . . . Duncan (1959).
      • When author’s name is not in the text, enclose the last name and year in parentheses— . . . (Gouldner 1963).
      • Pages cited follow the year of publication after a colon— . . . (Ramirez and Weiss 1979:239–40).
      • Provide last names for joint authors— . . . (Martin and Bailey 1988).
      • For three authors, list all three last names in the first citation in the text— . . . (Carr, Smith, and Jones 1962). For all subsequent citations use “et al.”— . . . (Carr et al. 1962). For works with four or more authors, use “et al.” throughout.
      • For institutional authorship, supply minimal identification from the complete citation— . . . (U.S. Bureau of the Census 1963:117).
      • List a series of citations in alphabetical order or date order separated by semicolons— . . . (Burgess 1968; Marwell et al. 1971).
Appendix J. Notice to Contributors

- Use “forthcoming” to cite sources scheduled for publication. For dissertations and unpublished papers, cite the date. If no date, use “n.d.” in place of the date—. . . Smith (forthcoming) and Oropesa (n.d.).
- For machine-readable data files, cite authorship and date—. . . (Institute for Survey Research 1976).
- Notes should be numbered in the text consecutively using superscript Arabic numerals. When referring to a note later in the text, use a parenthetical note—. . . (see note 3).
- Equations in the text should be typed or printed. Use consecutive Arabic numerals in parentheses at the right margin to identify important equations.

4. Notes should be double-spaced, in a separate “ENDNOTES” section. Begin each note with the superscript numeral to which it is keyed in the text (e.g., “6”). Notes can (a) explain or amplify text, (b) cite materials of limited availability, or (c) append information presented in a table or figure. Avoid long notes: consider (a) stating in the text that information is available from the author, (b) depositing the information in a national retrieval center and inserting a short endnote or a citation in the text, or (c) adding an appendix. Each note should not exceed 100 words.

5. References are presented in a separate section headed “REFERENCES.” All references and data sets cited in the text must be listed in the reference section, and vice versa. Publication information for each must be complete and correct. List the references in alphabetical order by authors’ last names; include first names and middle initials for all authors when available. List two or more entries by the same author(s) in order of the year of publication. When the cited material is not yet published but has been accepted for publication, use “Forthcoming” in place of the date and give the journal name or publishing house. For dissertations and unpublished papers, cite the date and place the paper was presented and/or where it is available. If no date is available, use “n.d.” in place of the date. If two or more cited works are by the same author(s) within the same year, list them in alphabetical order by title and distinguish them by adding the letters a, b, c, etc., to the year (or to “Forthcoming”). For works with more than one author, only the name of the first author is inverted (e.g., “Jones, Arthur B., Colin D. Smith, and James Petersen”). List all authors; using “et al.” in the reference list is not acceptable. References for data sets should include a persistent identifier, such as a Digital Object Identifier (DOI). Persistent identifiers ensure future access to unique published digital objects, such as a text or data set. Persistent identifiers are assigned to data sets by digital archives, such as institutional repositories and partners in the Data Preservation Alliance for the Social Sciences (Data-PASS). Refer to the ASA Style Guide (4th ed., 2010) for additional examples:

6. Tables should be numbered consecutively in the order in which they appear in the text and must include table titles. Tables will appear in the published article in the order in which they are numbered initially. Each table must include a descriptive title and headings for all columns and rows. Gather general notes to tables as “Note:” use a, b, c, etc., for table footnotes. Use asterisks *, **, and *** to indicate significance at the $p < .05$, $p < .01$, and $p < .001$ levels, respectively, and always specify one-tailed or two-tailed tests. Generally, results at $p > .05$ (such as $p < .10$) should not be indicated as significant.

7. Figures should be numbered consecutively in the order in which they appear in the text and must include figure captions. Figures will appear in the published article in the order in which they are numbered initially. Preferred programs and formats for figures include the following: Excel, Word, PowerPoint, .wmf, .emf, and .tif (300 dpi).

PERMISSION: The author(s) are responsible for securing permission to reproduce all copyrighted figures or materials before they are published by ASR. A copy of the written permission must be included with the manuscript submission.

8. Appendices should be lettered to distinguish them from numbered tables and figures. Include a descriptive title for each appendix (e.g., “Appendix A. Variable Names and Definitions”).
