Global and Transnational Sociology  
Selective Bibliography

This bibliography is extensive but hardly comprehensive. It no doubt omits numerous important works of both general and specialized interest. One task of the section will be the on-going compilation and ordering of a searchable bibliographical data base that will be readily accessible online and updated on a regular basis. Some of the literature included here comes from disciplines other than sociology, notably anthropology, economics, history, and political science, reflecting the considerable intermingling of the social sciences in recent decades. Such intermingling is particularly pronounced in global and transnational scholarship. Note that the proposal cites only a small portion of these references.
