Assistant Professor - Sociology & Criminology Department

The Department of Sociology and Criminology (https://sociology.la.psu.edu/) at The Pennsylvania State University in University Park, Pennsylvania, USA, invites applications for an Assistant Professor. This is a tenure-line position to begin in Fall 2024.

We are seeking an outstanding scholar whose research and teaching focuses on inequity in education, health, medicine, or crime, violence, and the criminal justice system due to race, ethnicity and/or migration status. Duties for an Assistant Professor will involve a combination of research, teaching, and service in either the sociology or criminology program (or both) at Penn State. The ideal candidate will also be able to contribute to Penn State's Latina/o Studies Program.

This position is co-funded by Penn State’s interdisciplinary Social Science Research Institute (SSRI: https://ssri.psu.edu/) and is part of an initiative to hire multiple faculty members in different units across Penn State. These faculty members will join an existing campus cluster, with the goal to foster collaborations among social and behavioral scientists and others, working from the person to the population levels to improve understanding and reducing disparities. We also welcome scholars who use any variety of methodologies.

SSRI's mission (https://ssri.psu.edu/about/ssri-overview) is to foster research that addresses critical human and social problems at the local, national, and international levels. SSRI has five strategic foci: 1) the causes and consequences of inequality, 2) human development and behavior, 3) the social and environmental determinants of health, 4) innovative and data intensive research methods, and 5) individual and community impact. SSRI supports interdisciplinary research by bringing together researchers across the university around emerging areas, and by providing consultation, seed grants, faculty fellowships, and core resources tailored to the needs of social and behavioral scientists.

Candidates for this position should show demonstrated ability as a researcher and teacher, evidence of scholarly and professional growth, and must complete their Ph.D. in Sociology, Criminology, or related field by the time of appointment.

To apply, submit a cover letter outlining your research interests and qualifications, a curriculum vitae, and the names/contact information of three references at https://apptrkr.com/4635327. In addition, successful candidates must either have demonstrated a commitment to building an inclusive, equitable, and diverse campus community, or describe one or more ways they would envision doing so, given the opportunity.

Review of applications will begin immediately and continue until the position is filled. To receive full consideration, materials should be received by October 26, 2023.
Information regarding the Department can be found at https://sociology.la.psu.edu/.

Salary Range: Negotiable

Job Description:

The Kinder Institute for Urban Research at Rice University is seeking a tenured Associate or Full Professor to fill the position of Director of Economic Mobility. This director will oversee an interdisciplinary team of community-engaged researchers who work closely with local partners on topics such as labor economics, economic development, discrimination, income and wealth inequality, financial security, and inter- and intra-generational mobility. Faculty directors in the Kinder Institute are expected to work closely with the institute director and leadership team to develop and maintain relationships with community partners, set the research agenda together with these partners, coordinate intersecting projects across research teams, and ensure that research use and impact are maximized. Faculty directors are also expected to secure research grants, working closely with the leadership and grant writing teams. Leadership experience and community partnership experience is required.

Candidates must have a Ph.D. or terminal degree and an outstanding record in urban research, experience leading a research team, and experience in community-engaged research done in partnership with local organizations that apply the research in meaningful ways. Faculty members are on nine-month appointments and the successful candidate will have a tenure home in the department that aligns with the selected applicant’s disciplinary background (see here for a list of departments at Rice), which includes teaching undergraduate and graduate courses in that department. Grant funding may be used for course buyouts. Kinder faculty directors are expected to center their research efforts on institute projects, utilizing the institute’s resources, and co-developed with the institute’s community partners, aiming to inform their efforts to improve lives. Because the Kinder Institute focuses on maximizing research use and impact, institute researchers work closely with community partners to develop the research agenda, plan how research will be used, and generate informative research products beyond, but inclusive of, academic publications.

The Kinder Institute for Urban Research is an interdisciplinary research organization that works in direct partnership with local agencies and organizations that use its research, data, and policy analysis to implement solutions to critical challenges facing the Houston region. The institute aims to improve lives through data, research, engagement, and action. It consists of (and is developing) five centers that conduct research on housing, education, public health, economic mobility, and population dynamics. Centers conduct research that focuses on their particular topics, as well as research that intersects across centers, through interdisciplinary teams that specialize in solutions-oriented, community-engaged research called research-practice partnerships (RPPs).

The Kinder Institute has a team of over 60 full-time research and administrative staff, plus faculty and student affiliates. Researchers benefit from access to hundreds of datasets, established long-term community partnerships, highly skilled interdisciplinary teams, and extensive research support such as financial, communications, and grant writing teams. Founded in 2010, the Kinder Institute was endowed with a gift from Houston philanthropists Richard and Nancy Kinder. Today, the institute generates funding from research grants, corporate sponsorships, individual donors, and an endowment.

The Kinder Institute is committed to promoting diversity, equity, and inclusion in our research and service endeavors. We strive to promote an environment that welcomes and respects diverse backgrounds, experiences, and views, as this diversity strengthens our research and our collaborative outreach efforts. In this spirit, we particularly welcome applications from all genders and members of historically underrepresented groups who exemplify diverse experiences. The search committee is eager to receive applications from scholars with lived experience related to the issues on which the Kinder Institute is focused.

Interested candidates should submit application materials through Interfolio at <a href='http://apply.interfolio.com/132357'>http://apply.interfolio.com/132357</a>, including a CV, cover letter, research sample, and statement of partnership research. The Kinder Institute has a team of over 60 full-time research and administrative staff, plus faculty and student affiliates. Researchers benefit from access to hundreds of datasets, established long-term community partnerships, highly skilled interdisciplinary teams, and extensive research supports such as financial, communications, and grant writing teams. Founded in 2010, the Kinder Institute was endowed with a gift from Houston philanthropists Richard and Nancy Kinder. Today, the institute generates funding from research grants, corporate sponsorships, individual donors, and an endowment.

The Kinder Institute is committed to promoting diversity, equity, and inclusion in our research and service endeavors. We strive to promote an environment that welcomes and respects diverse backgrounds, experiences, and views, as this diversity strengthens our research and our collaborative outreach efforts. We seek a colleague who can lead multidisciplinary research efforts to analyze the forces that damage trust in journalism and democracy and to strengthen the ability of journalists and others to rebuild credibility. The candidate should be familiar with the historical and contemporary issues in American journalism that make it prone to distrust, including from members of marginalized groups; be able to critically evaluate these issues; consider solutions; and engage in productive self-reflection. They will have a track record of collegial collaboration and be expected to advise doctoral dissertations and master’s theses. They also will be expected to make research visible to policy makers and others so as to have an impact on the conversation around journalism’s role in democracy. A Ph.D. is strongly preferred.

Widely regarded as the nation’s leading school of communications, the S.I. Newhouse School of Public Communications at Syracuse University is home to approximately 2,000 undergraduates, 180 residential master’s degree students, 200 online master’s degree students and 15 doctoral degree students. They are among the best in the country, having secured a place in the class through a highly competitive admissions process. The typical admitted first-year student has a 3.8 GPA.
The School’s 250,000-square-foot, three-building complex is a leading-edge learning environment where students are exposed to the tools and technologies used by professionals in the field. Features include Dick Clark Studios, a high-tech entertainment production facility that rivals many Hollywood studios; the Diane and Bob Miron Digital News Center, complete with a contemporary news set, a green screen, state-of-the-art lighting systems and cameras; the Alan Gerry Center for Media Innovation, a creative hub where Newhouse expertise in content development and production meets the latest media technology and programming trends; the Emerging Insights Lab, a state-of-the-art social media command center; and the Collaborative Media Room, home to the student-produced multimedia news site, The NewsHouse.

In January 2020, the S.I. Newhouse Foundation announced a $75 million gift to the Newhouse School, the largest donation to Syracuse University in its 150-year history and one of the largest ever to any communications school.

Job Description:

Postdoctoral Position in Work and Organization Studies

Professor Nathan Wilmers is seeking a Postdoctoral Researcher to collaborate on sociological research on labor market inequality. Candidates should have an interest in how firms, organizations, and labor market institutions affect inequality. The position will support a mix of the candidate's own solo research alongside collaborative, co-authored work with Prof. Wilmers. During the course of the appointment, there are possible data access opportunities, dependent on various eligibility requirements, to the Longitudinal Employer-Household Dynamics data, the Economic Census microdata, Glassdoor reviews, employer-matched PSID data, and Burning Glass job postings. This is a two-year position with the possibility of remote work within the US (constrained only by some data access restrictions). The position will be focused entirely on research, with no teaching obligations.

There is substantial scope to design research projects that fit both the candidate's and Prof. Wilmers' research agendas. Currently, Wilmers has projects studying how social relations within organizations affect inequality; structural barriers to upward mobility within organizations; drivers of recently rising pay for low-wage jobs; changing employment practices in response to tight labor markets; and effects of union democracy and contention within American labor unions. More broadly, Wilmers aims to use ideas from economic sociology to clarify the social foundations for rising and falling inequality.

This position will be housed in the MIT Sloan School of Management’s Work and Organizations group. The position duration is two years with a start date of July 1, 2024 or as soon thereafter as possible. Candidates must possess, or be close to completion of, a Ph.D. in one of a variety of fields, including but not limited to Sociology, Organizations, Strategy, Management, Economics or Political Science at the start of employment.

Please submit applications electronically at (http://apply.interfolio.com/130576) providing a cover letter, CV, research statement, and one or two papers that indicate your research focus and capabilities. Applications must be submitted by November 1, 2023.

MIT is an equal opportunity employer committed to building a culturally diverse and pluralistic intellectual community and strongly encourages applications from women and minorities. Employment is contingent upon the completion of a satisfactory background check.

**Employer Description:**

**The University**
Established in 1791, the University of Vermont is considered a public-ivy and consistently ranked as one of the top public universities in the United States. Our academic programs combine faculty-student relationships most commonly found in a small liberal arts college with the resources of a land-grant research institution. UVM's tradition of equity and social justice extends not only to faculty, staff, and students, but also in a commitment to environmentally sound and sustainable practices.

**The College**
In the College of Arts and Sciences (CAS), students experience the connectedness and accessibility of a small liberal arts college within a high caliber public research institution. Whether students are pursuing the Fine Arts, the Humanities, Natural Science and Mathematics or Social Sciences, they have a place here, in the College of Arts and Sciences' academic ecosystem. The College of Arts and Sciences highly values the excellence that results when people from different backgrounds and perspectives work, interact, and learn together. In this way, commitment to diversity fosters our educational mission. For our students, it prepares them for life and work ahead: it recognizes that we are a culturally, ethnically, and racially diverse nation, one that is also situated in an increasingly global environment. For our faculty, scholarship and research are increasingly cooperative activities-often crossing national borders—requiring the abilities and skills to work with others often from very different backgrounds. For both our students and faculty, diversity enhances our curriculum, enriches the classroom experience, and fosters the exchange of ideas. As our society, economy, politics, and global interactions become increasingly diverse, so too must our intellectual community of students, faculty, and staff.

**The Community**
UVM is located in Burlington, Vermont, which is rated as one of the best small cities in the country. The greater Burlington area has an increasingly diverse population of about 125,000 and enjoys a panoramic setting on the shore of Lake Champlain, between the Green Mountains of Vermont and the Adirondack Mountains of New York State. The surrounding area provides an environment rich in cultural, civic and recreational activities. Vermont has a deep history of social activism and political participation. It offers many opportunities for collaborative partnerships in community and state-wide human service and social change organizations in multiple fields of practice, including state agencies.

Establishing a diverse and inclusive culture is a priority at the University of Vermont. In fact, UVM holds that diversity and academic excellence are inseparable. Read UVM’s Why Diversity Statement and Our Common Ground values. The University of Vermont is an Equal Opportunity/Affirmative Action Employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability, protected veteran status, or any other category legally protected by federal or state law. The University encourages applications from all individuals who will contribute to the diversity and excellence of the institution.

UVM is especially interested in scholars who can contribute to the College of Arts and Sciences diversity plan, which was designed in part to ensure faculty, students, and staff members from underrepresented and marginalized populations are an integral part of the life and governance of the institution.

Salary Range: Negotiable

**Job Description:**

Fung Global Fellows Program, Princeton University | Academic Year 2024-25

Princeton University is pleased to announce the call for applications to the Fung Global Fellows Program at the Princeton Institute for International and Regional Studies (PIIRS). The program will select early-career scholars from around the world to be in residence at Princeton for an academic year and to engage in research and discussion around a common theme. The fellowships will be awarded to scholars employed outside the United States who have a faculty appointment, a professional research appointment, or are an established independent scholar. They will also be expected to return to their positions at the conclusion of the fellowship. Lastly, they must have demonstrated outstanding scholarly achievement and unusual intellectual promise. Early-career scholars will be appointed at the rank of Visiting Research Scholar. The number of candidates hired at this rank will depend on the qualifications of the overall applicant pool.

During the academic year 2024-25, the program theme will be “Colonial Residues.” Colonialism is frequently evoked today as a root cause of global inequity or, in some jarring instances, nostalgic celebration. In both the “new” states and the “old” ones that reluctantly let them go, colonialism’s many impacts are ubiquitous—its traces often tangible and measurable, shaping political regimes and socioeconomic wellbeing while also determining whose stories are told and by whom; whose achievements are celebrated and how; and whose resources are used, removed, or polluted. We invite applications from scholars whose work expands our understanding of this phenomenon. Applicants may address any region of the world, past and present, and may be from any disciplinary background in the humanities and social sciences. The hope is that we will enable a truly exceptional set of international scholars to come together to interrogate today’s colonial residues, asking how they may be apprehended, and if there might not even be scalable solutions for our common future.

Applicants must apply online at [https://www.princeton.edu/acad-positions/position/31841](https://www.princeton.edu/acad-positions/position/31841). Applications are due on November 15, 2023 (11:59 p.m. EST). To be eligible, applicants must have received their Ph.D. (or equivalent) no earlier than September 1, 2014. Fellowships will be awarded on the strength of a candidate’s proposed research project, the relationship of the project to the program’s theme, the candidate’s scholarly record and ability to contribute to the intellectual life of the program. More information: [https://funggfp.princeton.edu/applications](https://funggfp.princeton.edu/applications).

The following items must be submitted by the applicant, in English, by November 15, 2023:

- Cover letter (1.5 pages maximum)
- Curriculum Vitae (including publications)
- Research proposal (maximum of 3 pages, single spaced)
- One writing sample (article or book chapter, maximum of 50 pages)
- For those applicants with a current faculty appointment or a professional research appointment, an official letter from the applicant’s current employer affirming that, should an offer be made, the applicant would be permitted to accept it and to spend the academic year at Princeton University. If applicant is an established independent scholar, please upload a PDF stating this as the applicant’s current status.
- The names and email addresses for three referees, who will be contacted automatically by the online application system with an invitation to upload their letter of recommendation to the system by the application deadline. (*Please note: all letters of reference should be submitted by your referees before the November 15, 2023 deadline.*)

*Princeton University is an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability status, protected veteran status, or any other characteristic protected by law.*

Position/Rank: Academic Positions: Assistant/Associate Professor
Tenure/Tenure Track: Tenure Track
Special Program and Areas of Faculty Expertise: Criminology/Delinquency , Criminal Justice
Salary Range: Negotiable

Job Description:

The Department of Criminology, Law and Society (CLS) at the University of California, Irvine invites applications for one tenure-track assistant/tenured associate faculty position in CLS whose research, teaching and service contribute to UCI’s Black Thriving Initiative and Faculty Cluster Hiring in Poetic Justice. We are interested in candidates whose research demonstrates expertise in: 1) examining how surveillance, mass incarceration and/or other forms of punitive regulation have impacted and/or been challenged by Black communities; and 2) utilizing research methods that engage with experiences of system-impacted groups, including Black and other marginalized communities. We have a particular interest in candidates who collaborate with public-facing institutions (e.g., libraries, museums, and community-based organizations) to expand data and research accessibility to support social justice movements. CLS is an interdisciplinary department with faculty trained in criminology, law and society, anthropology, history, ethnic studies, sociology, and economics, among other disciplines.

At every crucial juncture in our nation’s history, Black authors, artists and other creative workers have produced new narratives, images and social practices that challenge systemic anti-Black racism and affirm Black life and humanity. This position is part of a BTI Faculty Cluster Hiring Initiative on Poetic Justice. Leveraging campus-level cultural infrastructure, including the Langson Libraries and Institute and Museum of California Art, the Poetic Justice initiative is a collaboration between the Departments of African American Studies and Comparative Literature in the School of Humanities; the Department of Art in the Claire Trevor School of the Arts; the Paul Merage School of Business; and the Department of Criminology, Law and Society in the School of Social Ecology. Faculty hired as part of the cluster will develop the Poetic Justice initiative, including innovating how we study the racial effects of slavery, segregation and mass incarceration, and leading community-based activities that support the economic and cultural well-being of Black communities in Southern California and beyond.

Launched in 2020 during the racial reckoning, the UCI Black Thriving Initiative mobilizes the entire university to transform UCI into the nation's foremost destination for Black people to thrive as students, faculty, staff, and communities served by the university. To this end, it consists of three action platforms that seek to inform choices, decisions, and priorities as a great public research university. These are: change the culture, leverage the mission, and engage with communities. A major feature of BTI involves advancing understanding about the multifaceted Black experience and drivers of well-being in support of Black communities.

The associated faculty cluster hiring program builds on and expands our shared values of diversity, equity and inclusion and commitment to social justice. Selected from a multi-year competition, the three BTI hiring clusters reflect the power and promise of interdisciplinary collaboration. They are: Environmental Health Disparities, Infrastructure Equity, and Poetic Justice. To accelerate and elevate the impact of the research, teaching, and service of participating and affiliated faculty, each cluster will receive dedicated programming support for three years. For more information, consult the BTI website: https://inclusion.uci.edu/action-plan/mdi/uci-black-thriving-initiative/

To ensure your application is given full consideration, files should be completed by October 1, 2023. Priority will be given to applications received by that date; however, applications will be accepted until the position is filled.

Candidates must have completed a Ph.D. by the position start date. The position will begin July 1, 2024 (teaching duties will begin Fall 2024). Applications must be uploaded electronically through the on-line Recruit system
