SYMPOSIUM ON SOCIOLOGICAL THEORY
Edited by Llewellyn Gross
University of Buffalo

"...this completely new and ground-breaking symposium merits a wide audience among behavioural scientists because it deals expertly with frontiers of social theory and method... One finds here a vigorous searching for new synthesizing principles relating novel approaches and theoretical frameworks with empirical findings. Throughout, there is a healthy concern for the interdisciplinary enterprise."—Marvin K. Opler, The International Journal of Social Psychiatry, Winter, 1959, 645 pp. $7.25

MAJOR SOCIAL PROBLEMS
By Earl Raab and Gertrude Jaeger Selznick
President, California Association for Mental Health;
Survey Research Center, University of California, Berkeley

"A new book profiling seven major social problems of our modern American society. It is the fulfillment of a massive undertaking in research... Each chapter... is followed by adaptations from other anthologies which enrich the content and provide a diversity of views."—E. G. Bell, Indiana Welfare Department, 502 pp. $6.50

SOCIOLOGY: A Text with Adapted Readings
By Leonard Broom and Phillip Selznick
University of Texas; University of California, Berkeley

The leading text for the beginning course in sociology. Representative adoptions in 1960 include: Bucknell University, Canisius College, Dartmouth College, Earlham College, Emmanuel College, Gustavus Adolphus College, Johns Hopkins University, LaSalle College School of Nursing, Mercy Hospital School of Nursing, Mount Mercy College, San Francisco State College, Toledo Hospital, University of Bridgeport, Washington State University. 661 pp. $6.90

MARRIAGE AND THE AMERICAN IDEAL
by FLOYD M. MARTINSON
Professor and Head, Department of Sociology and Social Work
Gustavus Adolphus College

January 1960 504 pages $5.50

This book, published under the advisory editorship of Professor Robert Bierstedt, is intended primarily as a preparation-for-marriage text. It maintains a consistent conceptual framework drawn from contemporary sociological and socio-psychological theory. It is, therefore, usable in "sociology of the family" courses and also in combined "sociological-functional" courses.

The author treats man as a valuing creature. Throughout the book he strives to show how the major value themes in American culture and the findings of social science relate to problems and decisions of marriage and family living.

Some Enthusiastic Comments from Professors

"Beautifully and lucidly written—handles research findings critically and effectively—carries through a distinctive theoretical framework... The publisher and author deserve our thanks for this major contribution to the marriage and family literature."—Reuben Hill, University of Minnesota

"The most striking feature of this book is the unbiased use of source material in strengthening the author's assertions, and the ease with which he handles statistics for comprehension by the layman. Even though this is a study and excellent for the classroom, I hope it supplements much of 'popular' literature now on American bookshelves. It is written in a good style and is extremely 'easy to take.'"—Th. Thomas Jones, Georgetown University

"Sensible; handles sex problems well."—Bruce M. Pringle, Southern Methodist University

If you wish to consider this text for your class use, write for a complimentary copy, giving title of present text and class enrollment.

AMERICAN SOCIETY
by Don Martindale
Professor of Sociology,
University of Minnesota

Organized around the theme of mass society, this new introduction to sociology sharply portrays the dramatic changes in twentieth-century America with their accompanying liquidation of traditional values.

Professor Martindale marshals historical and comparative materials that relate the distinctive aspects of American society to the development of Western civilization. He also provides four rich chapters on the institutions of play and the arts in twentieth century society, extends the theory of community, and presents a new approach to the theory of institutions.

SOCIALLY SYSTEMS
Essays on Their Persistence and Change
by Charles P. Loomis
Research Professor of Sociology and Anthropology,
Michigan State University

This series of essays by a renowned sociologist brings under analysis such social phenomena as religion, economic and social development and other forms of social change, disasters, and resistance to the new. In the opening chapter Professor Loomis develops his conceptual scheme, which is at once novel and soundly based upon proven concepts of sociology. The conceptual scheme, applied systematically throughout the book as an analytic tool for examining social systems, extends the theory of social change into new and challenging channels.

HUMAN ORGANIZATION RESEARCH
Field Relations and Techniques
Edited by RICHARD N. ADAMS, Michigan State University and
JACK J. PREISS, Duke University
This new book of selected readings analyzes research problems
encountered by field researchers and the methods utilized to solve
such problems. The emphasis is not on substantive findings of a
research effort but on the process of research.
The 32 separate contributions are divided into two main sections:
researcher relations with respondents, and specific techniques em-
ployed in various settings.
The treatment of the subject ranges from work in highly organized
industrial settings to relatively primitive cultural systems. Equal
emphasis is given to problems of field relations and field techniques.

Published for the Society for Applied Anthropology

UNDERSTANDING
ORGANIZATIONAL BEHAVIOR
By CHRIS ARGYRIS, Yale University
A detailed discussion of the theory and empirical methods developed
to study complex social organizations is provided in this new book.
The diagnostic procedures presented provide useful and practical
insights to diagnosing the organization with a minimum of human
disturbance, financial outlay, and disruption of the organization.

SOCIOLOGY TODAY
Edited by
The trends, unsolved problems and future prospects of contemporary sociology are set forth in this volume, published in association with the American Sociological Society. The distinguished contributors, each of them an authority on a particular aspect of sociological theory, methodology or application, include Clausen, Davis, Inkeles, Lazarsfeld, Lipset, Newcomb, Parsons, and the editors. 657 pages.

"The remarkable thing about the collection is that it genuinely serves the purpose suggested in the title—it conveys to the reader, with a great deal of fidelity, the very tone of sociological concerns in the last decade or so." Reuel Denney. "An impressively high standard of performance....It will serve as a guide to forthcoming developments in theory, research, methodology, and the sharpening specializations of sociology." Wellman J. Warner. Publisher's price $7.50
Price to members of the American Sociological Society $5.95

AMERICANS VIEW THEIR MENTAL HEALTH
By Gerald Garson, Joseph Veroff and Sheilla Feld
The first documented presentation of the fears, tensions, and anxieties that beset "normal" Americans today. Incorporating the findings of intensive studies of thousands of men and women representing an accurate cross-section of the population, the book was prepared at the Survey Research Center, University of Michigan; it is the fourth volume in the Joint Commission on Mental Illness and Health Series.

Price: $7.50

SOCIOCY: A Systematic Introduction
HARRY M. JOHNSON
Simmons College
Under the General Editorship of
Robert K. Merton, Columbia University

Rarely has an introductory textbook met with the enthusiastic acclaim and endorsement that marked the publication in April of Johnson's Sociology: A Systematic Introduction. Here is a rigorous, thorough-going, and methodical account of fundamental sociological principles—one that makes available to beginning students the widely accepted structural-functional theory.

In Sociology: A Systematic Introduction Professor Johnson assumes no previous knowledge of the subject on the part of the student. As Robert K. Merton points out, this text "informs the undergraduate about the ways of sociological analysis so that he can begin to think sociologically, rather than repeat concepts, ideas, and maxims that do not hang together. Above all, it has the merit of being written with such clarity that even complex ideas can be grasped by the reasonably intelligent student."

The Nature and Types of Sociological Theory

by DON MARTINDALE
University of Minnesota

In this new and original reassessment of the field, Professor Martindale distinguishes five main types of sociological theory and examines the contribution—and limitations—of each from its earliest philosophical and sociological roots to its most recent formulations. The text is distinguished not only by its analysis of the best known theorists of the nineteenth and early twentieth centuries but also by its full treatment of the significant representatives of contemporary European and American sociological theory.

Statistical Reasoning in Sociology

by JOHN H. MUELLER
and KARL F. SCHUESSLER
both of Indiana University

The aim of this new text is not only to teach basic statistical techniques but also to make plausible and comprehensible in humanistic terms the fundamentals of statistical reasoning. Illustrations and exercises are based on sociological data, and the techniques discussed are chosen with the needs of sociologists in mind. Throughout the book, applications are made to both qualitative and quantitative data. Among topics treated are measurement, averages, variation, standardization and norming, probability, correlation, sampling and hypothesis testing. An Instructor's Key provides answers to exercises.

Second, Revised Edition

American Society

A Sociological Interpretation

By ROBIN M. WILLIAMS, Jr.

Chairman of the Department of Sociology and Anthropology, Cornell University

This is a new edition of a widely adopted textbook in which an outstanding sociologist describes and analyzes the social groups and institutions—the family system, the dynamic economic order, the shifting social strata—which constitute American life today. In pulling together facts hitherto widely scattered he makes it possible to view as a whole the web of human relationships and competing values that characterize our social system. The revised edition retains the features that made the original work a landmark in its field. It has been revised page-by-page, and incorporates the most recent data as well as the theoretic advances of the past decade.

Although this text touches upon matters economic, political, and historical, these do not constitute its central content or interest. Instead, it draws upon all these valuable domains of study for data and principles that will help to describe and explain its own proper field: the social relations, and concomitant beliefs and values, that characterize the people of the United States. This important and challenging analysis has proved a solid foundation for courses in American Society.

FRUITLAND, NEW MEXICO
A Navaho Community in Transition
By Tom T. Sasaki, University of New Mexico

For many years a group of Navahos had lived in the irrigated farming community of Fruitland, on the San Juan River in northwest New Mexico. When a natural-gas pipeline was built across their reservation in 1950, their society was shaken to its roots. The technological, social, and economic changes which were among the repercussions of this event constitute the subject matter of this new study. 234 pages, illus., $8.75

RUSEMBILAN
A Malay Fishing Village in Southern Thailand
By Thomas M. Fraser, Jr.

The author lived in tiny Rusembilan for a year, exploring the extent of integration of this reasonably typical Moslem Malay community into the national structure of the country, and investigating the process of change occurring within the village itself. His scholarly analysis and interpretation round out his sympathetically written book which brings to life an exotic village and its people. 297 pages, illus., $5.75

AN ESKIMO VILLAGE
IN THE MODERN WORLD
By Charles Campbell Hughes, Cornell University

This study of a Siberian Eskimo village offers a historical perspective on sociocultural changes over a fifteen-year period beginning in 1940. During the year the author spent there, the village passed from being fairly isolated from the outside world to being increasingly dependent on the mainland not only for material needs but for many political and social directives. 433 pages, illus., maps, $6.75

SOCIAL PROBLEMS IN AMERICA
Costs and Casualties in an Acquisitive Society
By Harry C. Bredehoeft and Jackson Toby, both of Rutgers University. The function of this book is to give the reader an empathic understanding of the genesis of social problems while at the same time providing him with an intellectual understanding of the institutional sources of the problems. Bredehoeft and Toby accomplish their purpose by showing each social problem in the close-up detail of an illustration; and by systematically applying certain elements of leading contemporary social science theory. Rather than burden the reader with the explicit formulation of this theory, however, they use it in selecting the aspects of American social structure which are sources of behavior labeled "social problems."
A combination of Parsons’ and Merton’s analysis of deviance enables the authors to organize the social problems field in a systematic and illuminating way that for the first time ties this amorphous area into the main stream of the most advanced theoretical thinking.
Among the major themes dealt with are adolescence, criminality, labor problems, politics, religion, and unemployment.
1960. 350 pages. $6.75.

THE SOCIAL PSYCHOLOGY OF GROUPS
By John W. Thibaut, University of North Carolina; and Harold H. Kelley, University of Minnesota. Designed to bring order and coherency to present-day research in interpersonal relations and group functioning. To achieve this aim the authors employ simple concepts and principles which are defined and illustrated explicitly, and introduce new or more complicated concepts only when it becomes necessary. Basic principles used throughout are derived from the analysis of the formation of a dyadic relationship and the consequences of the pair’s continued interaction.
1959. 313 pages. $7.00.

SYSTEM AND PROCESS IN INTERNATIONAL POLITICS
By Morton A. Kaplan, The University of Chicago. First systematic attempt to build a theory of international politics on the basis of a detailed analysis of the social structure of the international system. The author examines alternate models of international systems from the standpoint of structure, membership, role functions, behavior, and environmental conditions necessary to sustain the system. The unified theory contained in the book is an empirical theory and, therefore, is potentially testable.

IMAGES OF MAN
THE CLASSIC TRADITION IN SOCIOLOGICAL THINKING

HERE, in one big, comprehensive volume, one of America's foremost sociologists presents the basic ideas that have shaped our conception of society and the individual today. "To read the company of thinkers presented here," as Professor Mills says, "helps us to understand what is happening in and to one's self." The "company" includes: Lippmann, Spencer, Manheim, Marx and Engels, Weber, Vehlen, Mosca, Michel, Pareto, Schumpeter, Simmel, Durkheim, Thomas and Znaniecki.

"An admirable collection of 'classics' in sociology, 'classics' taken to mean those men and their writings that 'have continued to be a point of departure for the work of others.' All selections are valid by the standard selected. Much is gained by reproducing enough of each selection so that the reader may have a real appreciation of style, reasoning and conclusion. The introduction by Mills has as much import for readers as some of the selections from the pens of the classicists."—Library Journal. Index. $7.50

A text for courses in survey research design and method

“This book fits neatly into a gap that has existed in the education of students of the liberal arts, the social sciences, and business. It is a scholarly work, which talks to college students in a delightful way in their own language. It is a pleasure to read, and to teach. . . . The statistical survey is there a unified sequence. The fullness of content is pleasing and helpful, from the construction and trial of the questionnaire, delimitation of the subject of en- quiry, the hiring and training of the interviewers, control of field-work, sampling, coding, tabulation, and interpretation. . . . The design of the book is a work of art, by a great master.”

W. EDWARDS DEMING, New York University
(pre-publication statement)

“This is not an elementary statistics text which represents ‘more of the same done differently’ but a ‘first of its kind done quite well.’ The words median, standard deviation, or correlation cannot be found in the index, for it is not a book about how to reduce data to ‘condensed but illuminating description’ nor about how to make valid inferences. Instead it contains hundreds of pages of sound advice on the many and varied problems involved in producing ‘statistical tables of scientific quality.’ Thus it is named Statistics in the Making, the material covering as it does every aspect of the collection (by interview or questionnaire) and tabulation of survey or census data. At last we have a book oriented toward the improvement of basic statistical data . . .”

Sister M. JACINTA MANN, S. C., Seton Hill College

Predicting Delinquency and Crime

By Sheldon and Eleanor Glueck. Introduction by Chief Justice Earl Warren. An entire battery of predictive tables and devices to enable administrators, clinicians, and social workers to detect potential delinquents at an early age. "The most comprehensive study on the subject.... The New York City Youth Board used the Glueck prediction table for 220 five-and-a-half to six-and-a-half-year-old boys entering the city's schools and was able to predict with eighty-nine per cent accuracy which ones would become school behavior problems four years later."—The Reporter $6.50

NEGROES AND PUERTO RICANS IN A CHANGING METROPOLIS

By Oscar Handlin. "An impartial view of the way the two latest-coming minority groups—the Negroes and the Puerto Ricans—are situated in the New York Metropolitan area; how their experience and their situation compares with that of earlier waves of immigrants . . . a most effective analysis and tool for practical purposes."—Saturday Review. A New York Metropolitan Region Study. $4.00

Public Health in the Town of Boston, 1630-1822

By John R. Blake. Based almost entirely on original source material previously unused, this book is the first detailed public health history of any American town in the period covered. While describing health and sanitation conditions and efforts to prevent disease it also reveals aspects of early 19th-century living conditions which should be taken into account in any consideration of the later effects on American life of industrialization and heavy immigration. $6.50

Studies on the Population of China, 1368-1953

By P’ing- ti Ho. In this exhaustive study and interpretation of China’s population, Dr. Ho “has put all future workers on this subject in his debt,” says John K. Fairbank. $6.00

Chronic Illness in a Rural Area

THE HUNTERDON STUDY

By Ray E. Crossell, M.D., M.P.H., and Jack Blimson, Ph.D. "General practitioners, public health physicians, social workers, and leaders in the broad fields of community welfare should find here an invaluable source of information that is essential for a better understanding of the challenge of long-term illness in the rural communities of the nation."—Journal of A.M.A. $7.50 This is Volume III of Chronic Illness in the United States (Commission on Chronic Illness. A COMMONWEALTH FUND BOOK.

The People of Alor

By Cora Du Bois. Originally published in 1944, The People of Alor has been recognized as a classic. A study of individuals and their society in a small, comparatively self-contained Indonesian island, it employed a new, interdisciplinary approach that has been the prototype of many later efforts in the field. An important new introductory chapter relates the original investigation to subsequent developments in the social sciences. Coming in November. $10.00

The Federal Government and Metropolitan Areas

By Robert H. Courey and Richard H. Leach. The “explosion” of the American metropolis is a major problem of our time. This volume focuses upon Federal programs in housing, highways, airports, military installations, water, and sewage. It analyzes metropolitan needs and suggests ways in which officials may give and receive information and assistance. A GOVERNMENTAL AFFAIRS INSTITUTE PUBLICATION. $4.75

Tribes of the Sahara

By Lloyd Cabe Brigg's. In this book, an expert who has lived for many years in Algeria describes the nomadic and sedentary people of the Sahara in terms of their land and its problems. Beginning with the dawn of the Christian era, he writes of the historical forces that have shaped their language, dress, food, and way of life. 16 pages of photographs. Glossary. Maps. $6.00

SOCIETY TODAY Problems and Prospects

Edited by: ROBERT K. MERTON
LEONARD BROOM
LEONARD S. COTTRELL, Jr.

With contributions by the editors and 27 other distinguished authorities

Published under the auspices of the

AMERICAN SOCIOLOGICAL ASSOCIATION

SOCIOLOGY: "On the whole, the best of the symposium volumes of simi-
lar or related scope and purpose published in this country during the last
two years. . . . Will be found very useful by graduate students and
many of their seniors who are trying, a bit desperately, to keep . . . well
informed." Floyd N. House, American Journal of Sociology.

PSYCHOLOGY: "There is something for nearly everyone here. It is not
a short cut to sociological knowledge, but it is clearly the best available
source for knowledge about sociology as a science in the making." Ernest R.
Hilgard, Stanford University.

EDUCATION: "An important volume, one that a decade hence, if some
comparable appraisal is attempted, will be regarded as an indispensable
landmark." Edmund deS. Brunner, Teachers College Record.

PSYCHIATRY: "A first class work." Iago Goldston, M.D., American
Journal of Psychiatry.

. . . It will serve as a guide to forthcoming developments in theory, research,
methodology and the sharpening specializations of sociology." Willman J.
