New Editors Appointed for Three ASA Journals; Begin Terms in 1976

New editors will take over three ASA journals in January 1976 for three year terms.

Doris Roberts Entwistle, professor of educational psychology, and engineering science, at the Johns Hopkins Univ., will edit the SOCIETY OF EDUCATION.

Mary E. W. Goss, professor of sociology in public health at the Cornell University Medical College, will take over the JOURNAL OF HEALTH AND SOCIAL BEHAVIOR.

Allen Day Grimshaw, professor of sociology at Indiana Univ., will assume the editorship of THE AMERICAN SOCIOLOGICAL REVIEW.

Professor Entwistle assumes the editorship of a journal which was previously published as the JOURNAL OF EDUCATIONAL SOCIOLOGY by the Payne Educational Foundation at New York University.

Grimshaw has been widely published in sociological, psychological and educational journals. In addition, he has authored AUTOPRIMER IN COMPUTER PROGRAMMING and WORD ASSOCIATIONS OF YOUNG CHILDREN and co-authored INTRODUCTORY SYSTEMS AND DESIGN AND ICONIC COMMUNICATION: AN ANNOTATED BIBLIOGRAPHY.

Professor Entwistle is currently on the editorial boards of ASR and SIMULATION AND GAMES. She also serves on the Social Science Training Review Committee, NIH.

Working Paper Sessions Retained; Some Modifications Introduced

A modified version of the Working Paper Sessions which includes a Feb. 13 deadline for submission of papers will be included in the program for the 1977 Annual Meeting.

Working Paper Sessions were initially introduced into the program during the Montreal meeting.

The February deadline was established so that titles of working papers and the names and addresses of their authors can be announced to the membership in early January. Logistics of scheduling prevent an extension of this deadline.

Early announcement of the papers will allow members to request advance copies from authors. Submission of a paper to the Sessions obligates the author to respond to each request.

Working papers will not be handled through the ASA Paper Sales during the San Francisco meeting. Authors will be required to bring copies of their papers to the meeting and to distribute them at the time of their presentations.

A listing of the working papers and times and places of the discussions will be made available to all registrants at the Annual Meeting.

Working Paper Sessions were established to expedite the dissemination of on-going, sociological research of interest to one's colleagues, and to present the opportunity for feedback on preliminary findings, complete analysis, developing theoretical ideas, untested methodological principles, policy or action implications, indeed any work in progress.

Submission of a paper is limited to members not otherwise listed in the Program in any capacity. These papers will not be refereed and will be accepted up to the limits imposed by available space.

See WORKING PAPERS, back page.

Executive Specialist Post Available

Candidates are being sought for the position of ASA Executive Specialist for Minorities and Women.

The position will become available Aug. 15 when Joan R. Harris, current occupant, returns to the Dept. of Sociology and Anthropology at Howard University. Harris assumed the post in August 1973.

The search is being conducted by a committee composed of M. Elaine Burgess, Chair; Paula Goldem and Robert Hill. The Executive Specialist is expected to demonstrate leadership and administrative skills in implementing policies, initiating plans and carrying through programs that improve opportunities for minority and women sociologists in universities, government agencies and other organizations.

Salary is competitive. A two-year term is preferable, but a one-year term is possible.

Applications and recommendations or suggestions about candidates should be sent to Burgess, Dept. of Sociology, Univ. of North Carolina, Greensboro, N.C. 27412.

Unfunded ASA Fellows Named

Sociology departments looking for promising graduate students may find them among the unfunded Fellows selected by the ASA Minority Fellowship Program during its first year of existence.

William A. Anderson, M.F. Director, said, "We consider the unfunded Fellows as very promising graduate students. We would have funded them through our program if we had had sufficient funds."

The Minority Fellowship Program received 371 applications during its initial year. Twenty applicants were funded as ASA Fellows with funds provided by NIMH and NIE. Additional applicants were designated unfunded ASA Fellows and alternates.

Current information indicates that 12 of the unfunded Fellows are currently enrolled in graduate programs; ten of them have some financial aid.

Nine other Fellows planned to enroll in graduate programs; three of them have some financial aid. Eight unfunded Fellows are not enrolled in graduate programs this academic year.

Current Fellows who do not have financial aid are:

C. Lee Gasbols, B.A. Chapman College, attending U.C.L.A. Home address is 1013 N. San Vicente Blvd., Apt. 9, Los Angeles, Calif. 90069

Mary Romano, B.A. Regis College, attending Univ. of Colorado. Home address is 747 Mariposa, Denver, Colo. 80204.

Fellows who planned to enroll in graduate programs and do not have financial aid are:

Joseph A. Dudley, B.A. Central Michigan Univ., planned to attend Central Michigan Univ. Home address is Route 2, Shepherd, Mich. 48883.

June L. Brown, B.S. Brooklyn College, planned to attend Fordham Univ. Home address is 101 W. 15th St., 83FV, New York, N.Y. 10011.

See UNFUND FOR TEND, back page.

Candidates Sought For minority director

A search is being conducted for a new Director of the ASA Minority Fellowship Program.

The position will become available August 15 when William A. Anderson, current Director, returns to the Dept. of Sociology, Arizona State University. Anderson assumed the post June 1, 1972.

The search is being conducted by a committee composed of Maurice Jackson, Chair; Raymond Mack, Jose Hernandez and Doris Wilkinson.

Applicants should send their vita to Jackson at the Dept. of Sociology, Univ. of California, Riverside, Calif. 92502 or to Otto N. Larsen, ASA Executive Officer, American Sociological Assoc., 1722 N Street, N.W., Washington, D.C. 20036.
Stoutner Award:

It would be a great honor to share an award with Leo Goodman, but I am returning the honor, asking you to reconsider your action. I state my reasons at some length and in the form of an open letter in the (no doubt opaque) hope that doing something that I may help the sociological fraternity better to sort out its priorities. I feel quite strongly that Goodman should be the sole recipient of the award, and the honor should not be diluted by associating it with work that should not receive an award for "general achievement in sociological methodology." Let me amplify both points.

Leo Goodman's contributions to methodology are many and ennumerate, but it is possible to characterize them briefly and unequivocally, mentioning some outstanding points. His analyzing mobility tables solved a problem that had plagued researchers in the field for at least two decades—the problem of how to display data in a meaningful way. Free of statistical artifacts, the pattern of association between origin and destination statistics is discerned, and he rendered a substantial corpus of previous work on "mobility ratios" and the like obsolete—no sober word will do—while combating interesting empirical examples of his own.

Goodman's collection of models for survey analysis does somewhat the same thing to the current generation of analysts as was more titularly done in the past. He has provided for the first time a set of statistical methods that are adequate to the demands of the "language of social research" heretofore associated with the Columbia school and kindred approaches to survey analysis. The practiced user of Goodman's technique is in the difficult position of having to do everything that this school attempted, and a great deal more. Hypotheses never dreamed of in classical survey analysis are stated (even if only implicitly) and tested almost routinely. Patterns of relationship painlessly intuited and dimly perceived by the survivalist school are now formalized and brought under rational control. It is a very interesting and no doubt portentous development. The body of data previously analyzed by even a skilled practitioner of survey analysis yields different conclusions by Goodman's methods. It is interesting to wonder if this is the case for a small but rapidly growing collection of actual examples. I do, in addition, to see if the fact how the practiced fell into both kinds of error—announcing effects that really are not adequately supported by the data, and failing to note features (as "significant") that effects are unmeasurable when the data are properly analyzed. It is to be hoped that researchers are now aware of the magnitude of the revolution that Goodman's methods are producing.

It is not something that is "obvious," no matter how complete his papers. You have to work hard to understand the papers and then work hard to apply the methods before the truth of the matter becomes evident.

In similar fashion, Goodman has put panel analysis on a sound footing for the first time. The consequence, we can now ignore a substantial body of misguided literature that provided erroneous, misleading, and dangerous procedures for manipulating panel data.

In his most recent contributions, some still unpublished, Goodman has provided a substantial foundation for the latent structure model of Lazarsfeld and the scaling model of Cattell. It is notorious that for the 25 or 30 years that

Stoutner Award: Duncan Requests Reconsideration of Award

Open Forum

I would like to respond briefly to three points in Dudley Duncan's letter to the Stoutner Award Selection Committee. First, as Duncan has noted, Samuel Stouffer was primarily interested in social psychology and test ideas. Stouffer considered himself as a "student ... struggling to put ideas about man's relation to man to an empirical test," and his methodological approach was "the invention of the tools needed in the testing." Empirical social research must necessarily be concerned with appropriate methods, and Stouffer's experimental methods have the evident advantage that they can contribute to the improvement of social research. In view of the experimental and correlational bases of research and methods, I would like to recommend that, in the future, the mandate of the Stoutner Award Selection Committee should be broadened, and instead of having an award for methodology alone, the Committee should seek to reward excellence in empirical social research and the advancement of methods that can facilitate such research. Such a reward would be consonant with Stouffer's ideals and his life's work, and it would also help to re-emphasize the importance of the institution mentioned above and also in Duncan's letter.

Second, with respect to Duncan's comment about his own work, I think that the Stoutner Award Selection Committee was correct in selecting him for an award. Duncan's research work is outstanding, and it has greatly advanced the methods new for sociological research. There is almost universal agreement on this point within the sociological fraternity, and so I need not take up space here to document the fact.

Third, with respect to Duncan's comments on the current state of methodology, there should be given our attention here, and hopefully this award will help us to try to improve the situation. The Stoutner Award Selection Committee can do its part to help improve matters by making the change suggested earlier in this letter.

Goodman Seeks Broader Mandate

I would like to respond briefly to three points in Dudley Duncan's letter to the Stoutner Award Selection Committee. First, as Duncan has noted, Samuel Stouffer was primarily interested in social psychology and test ideas. Stouffer considered himself as a "student ... struggling to put ideas about man's relation to man to an empirical test," and his methodological approach was "the invention of the tools needed in the testing." Empirical social research must necessarily be concerned with appropriate methods, and Stouffer's experimental methods have the evident advantage that they can contribute to the improvement of social research. In view of the experimental and correlational bases of research and methods, I would like to recommend that, in the future, the mandate of the Stoutner Award Selection Committee should be broadened, and instead of having an award for methodology alone, the Committee should seek to reward excellence in empirical social research and the advancement of methods that can facilitate such research. Such a reward would be consonant with Stouffer's ideals and his life's work, and it would also help to re-emphasize the importance of the institution mentioned above and also in Duncan's letter.

Second, with respect to Duncan's comment about his own work, I think that the Stoutner Award Selection Committee was correct in selecting him for an award. Duncan's research work is outstanding, and it has greatly advanced the methods new for sociological research. There is almost universal agreement on this point within the sociological fraternity, and so I need not take up space here to document the fact.

Third, with respect to Duncan's comments on the current state of methodology, there should be given our attention here, and hopefully this award will help us to try to improve the situation. The Stoutner Award Selection Committee can do its part to help improve matters by making the change suggested earlier in this letter.
NSF Announces Sociology Research Grants; 46 Projects Funded

Over $2.1 million has been awarded to 46 basic research projects by the sociology program of the National Science Foundation's Division of Social Sciences during the 1974 fiscal year. Sociologists were also funded by other programs in the division such as social psychology, social indicators, law and social policy, and health policy research. In all, $32,600 was awarded to 14 dissertation projects in sociology.

The National Science Foundation's Division of Social Sciences granted a total of 397 awards amounting to almost $24.4 million during the same period.

Donald R. Flock Program Director for sociology, said the same level of funding for sociology is anticipated for the 1975 fiscal year.

The NSF sociology program received 222 proposals during the 1974 fiscal year and acted upon 156 proposals. Sixty proposals were funded, including the 14 dissertation projects, while 90 others were not funded. Processing is continuing on 12 proposals.

Flock said, "Proposals are exhaustive, but fair. Proposals are subject to review by peers which usually include about three experts in the field. The proposal as well as discussion with our panel of consultants is turned around is approximately six months.

The panel of consultants includes Richard Simpson, Univ. of North Carolina, Chapel Hill; Vernon Dibble, Wesleyan Univ.; Charles Putwain, SUNY; Stan Brok, Harrison White, Harvard Univ.; and Beverly Duncan, Univ. of Arizona. Hal Winborn and Lynne Roberts have handled the processing.

Twenty-nine of the 46 projects are new; the others are continuations of projects which were begun up to four years ago. Awards went to 27 colleges and universities and two research organizations—National Opinion Research Center and the Center for Policy Research. The Universities of Michigan and Wisconsin received five grants apiece; NORC received three, and Columbia University two.

The funded projects may be classified into five categories: quantitative methods, history and change, social organization, demography, and qualitative methods.

SOCIOMETRICS

H. E. White, Harvard Univ., A Calculus of Social Networks, $32,100, new.

Basic Mathematical and Statistical Support

P. Meier, Univ. of Chicago, Statistical Methodology in the Social Sciences, $80,000, continued.

L. Kish, Univ. of Michigan, Analytical Statistics for Complex Samples, $20,100, continued.

M. Kotlikoff, Harvard Univ., Study of Quantitative Methods in the Social Sciences, $50,000, continued.

I. R. Savage, Florida State Univ., Mathematics in Sociology, $12,700, new, will work on problems of estimation in demography and mathematical logic in social psychological theories.

SURVEYS

H. Schuman, Univ. of Michigan, Effects of Survey Question wording on Survey Results, $140,100, new.

S. Sudman, Univ. of Illinois, $35,600, new, and J. A. Davis, M. Frankol, N. M. Bradburn, NORC, $130,000, new, Collaborative Research on Social Science Data Collection Methodology, will work on survey methodology taking interview context into account.

Mathematical Sociology

J. S. Coleman, NORC, Corporate Actors and the Structure of Power in Society, $40,000, new.

R. B. Ginsberg, Univ. of Pennsylvania, Testing the Extended Semi-Markov Model on Mobility, $69,300, new.

HISTORY AND CHANGE

Sociological History

T. R. L. Beadle, Univ. of Michigan, Collective Violence in Large-Scale Social Change, $21,200, new, and Collective Action and Conflict in Large-Scale Social Change, $71,800, new.

L. Stone, Princeton Univ., The Role of the University in English Social Change, with full application due Feb. 1, 1975.

A. Kerkhoff, Duke Univ., Comparative Models of Educational and Occupational Achievement, $3,600, new.

C. Kadushin, Teachers College, Comparative Study of National Leaders Network, $53,400, continued.

M. S. Podolny, Univ. of Chicago, A Cross-National Study of Social Networks and Community and Organizational Stratification, $37,000, new, compares German, Swedish, and British networks.

H. C. White, see above.

S. Leinhardt, see above.

S. Block, see above.

SOCIAL ORGANIZATION

Formal Organizations

P. M. Blau, Columbia Univ., Comparative Organizations of Social Movements, $76,300, new.

Three sociologists are among the nine Visiting Fellows currently engaging in projects at the National Institute of Law Enforcement and Criminal Justice in Washington, D.C. The sociologists are Stuart N. Adams, a corrections expert formerly with the D.C. Dept. of Corrections; Anthony L. Guerner, an associate professor at College of William and Mary; and Peter K. Manning, an associate professor at Michigan State University.

An additional 10-15 Fellows will be selected for the 1975-76 fiscal year. Preliminary applications are due Jan. 1, 1976 with full application due Feb. 1, 1976. The Visiting Fellowship Program is open to qualified criminal justice professionals and scholars seeking support on projects currently related to law enforcement and criminal justice. Fellowship recipients work in Washington on projects of their own design for periods of three months to two years.

During their fellowship, Adams is trying to develop guidelines to enhance the effectiveness and evaluations of criminal justice projects on actual projects.

Guerner is working on a book, THE SIX DIMENSIONS OF A PENITENTIARY, which is based on the six months he spent as a researcher at the Atlanta Federal Penitentiary studying the social organization of correctional officers and inmates.

Manning is completing a book examining the role of the policeman from the 18th Century to the present. In addition, he is beginning an analysis of drug law enforcement in two communities in an attempt to factor into account differences in arrest rates in the two jurisdictions. He will interview law enforcement officers and observe their operations during the study.

An application must include a resume and a 3-5 page description of a proposed project. These materials should be sent to Visiting Fellowship Program, National Institute of Law Enforcement and Criminal Justice, Law Enforcement Assistance Administration, U.S. Dept. of Justice, Washington, D.C. 20530. Applicants judged eligible for the program on the basis of these materials will be asked to submit a full fellowship application.

A fellowship is selected on the basis of his past work either in an academic position or in a professional career, on the relevance of his project topic, on the quality of his research design, and on the feasibility of conducting his project at the Institute's Washington office.

Fellows are usually accorded salaries and benefits to match those of the home institution. Relocation expenses are also covered.

In addition the program offers funds and facilities for studies on important criminal justice issues; access to extensive data resources, interaction with leading researchers and operational personnel; contact with criminal justice planning at the national level; access to a wide range of model programs; and an opportunity to contribute to the solution of major criminal justice problems.

C. K. Yang, Univ. of Pittsburgh, Community and National Integration in the People's Republic of China, $57,500, new.

J. S. Coleman, see above.

Professional

M. R. Haag, Case Western Reserve Univ., Changing Relationships Between Professional and Clients, the Case of Mental Health, $13,000, new, field research on the revolts of patients and the growing lack of trust in professionals.

Other

W. R. Cove, Vanderbilt Univ., Psychological Correlates of Status and Roles, $146,000, continued, a three year effort on correlates of sex roles.

R. N. Adams, Univ. of Wisconsin, Ugandan Asians in Exile—A Study of Minority Migration and Adjustment, $8,000, new.

C. Maxwell, Univ. of Wisconsin, Testing a Theory of Collective Action, $67,200, new, to test Mancur Ofln in a controlled field experiment.

R. Perlman and R. Warren, Brandsen Univ., Direct and Indirect Effects of Energy Conservation on Households, Employers, and Retailers, $47,100, continued, household bills as mediators of energy effects.

DEMOGRAPHY

International/Comparative

I. B. Tarozzi, Princeton Univ., Demography of the Chinese Population, $14,000, new, George Barclay will continue.

D. P. Maurer, Western State College, Demography of the Soviet Union, $46,700, new, concerned with Soviet ethnic groups (Estonians) and Eastern nations.

Social Psychological

C. B. Ham, Florida State Univ., Residential Mobility: Perspectives of Young People, $28,600, new, working with Morgan Lyons to see if youths are socialized into migratory expectations.

Traditional

W. C. Ruff, Univ. of Massachusetts, $37,500, new, and T. L. Van Valey, Colorado State Univ., $57,500, new, Collaborative Research on Segregation and Differential Mobility.

ENERGY

J. Perlman and R. Warren, see above.

OTHERS

J. A. Davis, NORC, A National Data Program for Sociology, $207,000, continued, start of $50,000 extension for the general social survey.

W. O. Hagstrom, Univ. of Wisconsin, Bibliographies in the Sociology of Science, $36,000, continued.

S. Schwartz, Univ. of Wisconsin, Determinants of Prosocial Behavior, $45,800, new.

C. W. Bohnak, Univ. of Nevada, Role of Phenomenological Variables in Norm Change: A Concept-BeHAVIOR Congruency, $15,000, new.

Summary descriptions of these research projects can be obtained for a small fee from the Information Exchange, 1720 M Street, N.W., Washington, D.C. 20036, and in most cases additional information can be obtained by writing directly to the principal investigator or project directors.
Rutgers Searches for Non-Academic Jobs for Sociologists

In December 1973, a general meeting of the Graduate Department of Sociology, including both faculty and students led to the development of a formal plan for graduate students to seek non-academic positions. The main goal was to ensure that all students had the opportunity to gain experience outside of the traditional academic environment.

The plan involved a series of events to help students explore job opportunities. These included seminars, workshops, and networking events designed to provide students with the skills and knowledge necessary to succeed in non-academic roles.

In addition to these formal events, a committee was formed to coordinate the efforts of students and faculty. The committee worked closely with university administrators to ensure that students had access to resources and support.

Overall, the goal of the plan was to help students make the most of their sociological skills and knowledge, and to provide them with the tools they need to succeed in a variety of non-academic settings.

Minority Fellowship

Application deadline for the 20 ASA Minority Fellowship, which will be awarded for the 1975-76 academic year is Jan. 10. See the October FOOTNOTES for additional information.

Applications may be obtained from William A. Anderson, Director, ASA Minority Fellowship Program, American Sociological Assn., 1722 N St., N.W., Washington, D.C. 20036.

NRC Research

Associationships

Three federal laboratories are offering postdoctoral research opportunities to behavioral scientists through a National Research Council administered program. Applications must be postmarked by Jan. 15 in order to be eligible for the 1975 program.

The Naval Medical Research and Development Command offers a postdoctoral research association which carries a stipend of $14,000.

The Defense Systems Command and the U.S. Army Natick Laboratories offer resident research associations which stipend of $15,000.

The selected scholars, their institutions, and periods of participation are listed below:

Herbert R. Barringer, Univ. of Hawaii to Seoul National Univ., Korea, July to July 1975.

D. Greefe, Univ. of Calgary, Canada, to Univ. of Zagreb, Yugoslavia, Oct. 1974 to June 1975.

Archibald D. Haller, Univ. of Wisconsin, Madison, to Univ. of Sao Paulo, Brazil, Chester L. Hunt, Western Michigan

Univ., to Univ. of Central Philippines, June to Oct. 1974.

George Riter, Univ. of Kansas to Univ. of Rotterdam, Netherlands, Jan. to May 1975.

Ida F. Rowseens, Morehouse College to Univ. of Zimbabwe, Jan. to May 1975.

Sakari Sartida, Univ. of Kansas to Univ. of Helsinki, Finland, Sept. 1974 July 1975.

Sociologists Named Fulbright-Hays Scholars

Ten sociologists have been selected as 1974-75 Fulbright-Hays Scholars to nine foreign countries. The Netherlands is the only country to receive more than one scholar. The Univ. of Kansas is the only university to send more than one scholar.

Seven of the sociologists are full professors, two are associate professors and one is an assistant professor. The scholars will or have engaged in research and/or teaching during their periods abroad which range from two to eleven months.

Seven of the scholars are participating in the program through full grants, two through travel grants, and one is on partial maintenance.

The selected scholars, their institutions, and periods of participation are listed below:

Herbert R. Barringer, Univ. of Hawaii to Seoul, South Korea, July 1974 to July 1975.

D. Greefe, Univ. of Calgary, Canada, to Univ. of Zagreb, Yugoslavia, Oct. 1974 to June 1975.

Archibald D. Haller, Univ. of Wisconsin, Madison, to Univ. of Sao Paulo, Brazil, Chester L. Hunt, Western Michigan

Univ., to Univ. of Central Philippines, June to Oct. 1974.

George Riter, Univ. of Kansas to Univ. of Rotterdam, Netherlands, Jan. to May 1975.

Ida F. Rowseens, Morehouse College to Univ. of Zimbabwe, Jan. to May 1975.

Sakari Sartida, Univ. of Kansas to Univ. of Helsinki, Finland, Sept. 1974 July 1975.

Open Nominations Deadline

Voting members of the ASA may select nominees for the 20 positions to be filled in the 1975 election by submitting valid nominating documents to the Executive Office by Jan. 6. See the November FOOTNOTES for the candidates named by the ASA Committee on Nominations and the rules governing the open nominations process and the election of candidates in the 1975 election.
Russell Sage Offers 3 Resident Fellowships

Russell Sage Foundation will accept applications for a fellowship program for advanced graduate students in the social sciences until Jan. 30. Three Fellowships are awarded annually to students planning their third or fourth year of doctoral studies who wish to spend a year at the Foundation’s offices in mid-Manhattan. Announcement of acceptance will be made by April 1.

The program is designed to provide an opportunity for a small group of exceptionally talented graduate students to become acquainted first-hand with the development and support of policy-relevant social sciences.

Fellows will be expected to spend at least half-time completing their doctoral dissertations during the year, and eligibility is restricted to students who have faculty approval for their dissertation research and are well advanced in its execution.

Interested students may apply by having a faculty member submit a letter of nomination to the Foundation. In addition, the candidate should submit a letter describing his or her interests in the social sciences, the subject of his or her doctoral research, and reasons for seeking entry into the program. The candidate’s letter should be accompanied by a curriculum vitae and three letters of reference.

Lists of recommendation and all accompanying documents should be sent to Dr. George R. Vickers, Co-Director, Russell Sage Foundation Fellowship Program, Russell Sage Foundation, 230 Park Ave., New York, N.Y. 10017.

Record Voter Turnout Recorded For First Presidential Runoff

Over seventy percent of the ASA voting members in South Dakota, Delaware and New Mexico voted in the first presidential runoff election held by the Association.

The runoff election followed a precedent setting general election which featured the largest slate of candidates in the history of the Association. The total number of candidates who had been placed on the ballot by the newly adopted nominations procedure.

Voting members in South Dakota produced the greatest turnout, 76.6 percent, in the runoff election which recorded a turnout of 4,402 persons or 54.1 percent. Delaware was a close second with 76.0 percent and New Mexico was third with 71.4 percent. The turnout in the fifty states of this country was 423 persons or 55.6 percent. The turnout of voting members in foreign countries and U.S territories reached 32.4 percent or 179 members.

A high percentage of members in several other states also cast their ballots. West Virginia had an overall runoff voting percentage of 68.9 in Oklahoma 49.2, Rhode Island and Connecticut 76.9; Vermont 66.7, Washington 66.1 and North Carolina 66.4.

Above average turnout also occurred in Tennessee, 63.9; Iowa 62.2; Indiana 61.8; Arizona 61.3; Colorado 60.4; Illinois 57.8; Georgia 57.7; South Dakota 57.6; Montana 57.5; Idaho 57.4; California 57.2; and Wisconsin 56.0.

Seventy percent of registered members voted Alabama 54.6; Wyoming 45.5; North Dakota 43.4; Texas 43.2; New Mexico 42.8; Ohio 42.7; Colorado 42.6; and Michigan 42.4.

One of the most consistently troubled areas for the Executive Office involves address changes from members and subscribers. The volume alone creates a problem. In September, 1974 more than 4,500 address changes were received in the office. Perhaps an expansion of the procedures used in the Executive Office would be in soliciting the members cooperation and patience.

When an address change is received it is checked with the previous address information (in some cases no old address is furnished), the process is delayed. All coded changes are sent to the computer service bureau on the 20th of each month (additions and deletions are handled the same way).

Once the entire list has been updated (10-14 working days), the mailing labels are run for all the journals to be mailed during the subsequent month. Therefore, if a change appears in the office on the 31st of the month, it will be at least six weeks before it appears on the label.

With this background in mind, members could help the efficiency of the Executive Office by doing the following:

1. Send your change of address as soon as you know your new location. Do not wait until you have actually moved.

2. Send a label from a recent ASA mailing. This includes various codes which simplify locating the tape entry. If you cannot send a label, do copy all the information included on the label.

3. Print or type your new address including the zip code.

4. If changing both home and business addresses, include both new addresses and indicate which you prefer for your mailings. It is surprising how many members are listed on ASA records as residing in one part of the country and being employed in another.

5. If your mail from ASA does not come to your new address within two months, please let us know.

6. Because changes take so long to implement and are so expensive, the ASA will not make any changes for short periods of time, such as a summer away from your home base. Have someone forward your mail.

7. It can take three to six months for bulk-rate mail to reach some parts of the world. Consequently, if you are planning a long stay or if you are permanently re-locating outside the United States or Canada consider having your mail sent to a residence or office here and having it forwarded.

8. If you notify the post office that you wish your mail forwarded, you should be aware that this includes first class mail only (and that only for one year) unless you indicated your willingness to pay for the forwarding of second and third class mail upon receipt.

9. Turnover of journals are not returned to the ASA. They are destroyed by the Post Office. Therefore, if you did not receive a mailing, you can only order a new one.

10. The Executive Office staff tries to deal with problems that occur in this area, but, hopefully, is moderately successful. However, with your cooperation, the operation can be made even more efficient.

Sociological literature generally associates mobility of various types with desirable outcomes, usually supports attempts to increase the mobility opportunities of various groups in our society.

Sociologists, however, may inadvertently be contributing to undesirable outcomes for one mobile group in our society - undergraduate transfer students.

Consequently, sociologists and others have been asked to examine the policies in their departments which relate to transfer students in order to determine whether any of the policies create artificial barriers for transfer students.

This request was made in a report from the Association Transfer Group, an informal assembly of representatives of associations and institutions with interests in postsecondary education. ATG was convened by the American Council on Education.

The ATG report states "full opportunity in post-secondary education in the 1970s demands special attention to removing the barriers encountered by students whose circumstances require that they transfer from one institution to another."

Statistics indicate over of every four full-time freshmen will transfer during their college careers.

The report attributes part of the problem to the invincible distinction made between transfer students and freshmen: "Much serious discussion is distorted by implicit suggestions that transfer students are somehow alien, immigrant, adopted, nouveau riche, converted to financial aid and undefined provisions for waiver of requirements."

The report made the following recommendations to faculty members:

1. Establish and publicize criteria for waiver of course or faculty experiences which do not differentiate between native and transfer students.

2. Establish and publicize criteria for assigning credit to non-traditional education experiences (for example, military, industrial, internship) through non-traditional evaluation procedures such as challenge exams and national testing and evaluation programs.

3. Examine course prerequisites, residency requirements, faculty and departmental permission requirements for course enrollment, and admission and graduation requirements to determine whether they are, explicit, consistent, relevant, non-discriminatory, and necessary.

4. Undertake research protocols for determining competency, and begin process of broadening degree requirements to include, in addition to course completion, the recognition and attainment, regardless of how, when, or where.

5. Modularize courses to permit attainment of prerequisites without registration for an entire course and to facilitate patching of courses in sending and receiving institutions.

Summer Fellowships

In Mental Health

Three Summer Research Fellowships in Mental Health are being offered for the summer of 1975 by the Mental Health Research Unit of the New York State Dept. of Mental Hygiene in Albany.

The fellowships which cover an eleven week period include one position at $3,600 to $4,000, and two pre-doctoral, $2,400 Travel expenses are also covered.

Applications are due by Feb. 1. They should include a curriculum vitae, a brief statement of research interest, a tentative outline of a summer agenda, and two supporting letters from those familiar with the applicant's work. Selections will be announced by March 15.

The department is especially interested in research in the following areas: inter-organizational relations and continuity of services to clients under a unified services approach to treatment delivery, analysis and evaluation of aftercare community treatment programs; violence and mental illness; operations research, and research utilization.

Send applications and inquiries for further information to Henry J. Steadman, MD, Mental Health Research Unit, 44 Holland Ave., Albany, N.Y. 12229.

1975 Program Adds Social Indicator Session

A session on 'Social Indicator Models' to be organized by Kenneth C. Laird, University of Illinois, Urbana, has been added to the program for the Annual Meeting in San Francisco. As with regular sessions (see August and November FOOTNOTES), papers must be submitted to the organizer by January 15, 1975.

MANUSCRIPTS FOR THE ASA ROSE SOCIOLOGY SERIES

Manuscripts (100 to 300 typed pages) are solicited for publication in the ASA Rose and Caroline Rose Monographs series which welcomes a variety of quantitative or qualitative empirical studies, and theoretical or methodological treatments. An author should submit three copies of a manuscript for consideration to the Series Editor, Professor Ida Harper Simon, Department of Sociology, Duke University, Durham, North Carolina 27706.
Sociologist Writes Column For Weekly Newspaper

His toughest problem is picking a theme each week. "The picking of a topic takes much longer than the actual writing of the column," he said. He allows himself three hours to produce each column.

He continued, "I also have the problem in that not receiving any financial support for this enterprise I am treating it as an appointment. I would like to be able to syndicate such a column, and thus make it part of my professional responsibilities." 

Collegiate reaction to the column has been mixed. Some colleagues have declared it "a good idea," while others have branded it "unprofessional activity." 

Stern said public reaction has been positive. "A number of my friends, students and others have begun to ask if I am the Eugene Stern who writes for the New Era," he said.

Stern also cited other rewards. "I think that with the urging of the New Era staff I am learning to make fewer generalizations which are not substantiated, (5) to improve my writing and (6) to become more aware of audiences." He had no previous experience prior to launching his column.

Stern became a columnist through his friendship with the New Era editor. "I accepted them once why not another sociological column for newspapers. He said he didn't know but it sounded like a good idea to him, and if I wrote a column he would like to publish it. He placed my name on me, telling me that whatever I wrote he would print as long as I did not get carried away with length.

More Sociology Majors Gained Than Lost to Other Disciplines

Ninety percent of the students who major in sociology are recruited during their undergraduate careers, primarily from other social sciences.

However, seventy percent of the entering freshmen who plan to major in sociology switch to other fields, primarily the other social sciences, during their college careers. Sociology gains four students from all other fields for every one it loses to them. More specifically, it gains three students in the other social sciences for every one it loses to them. 

These findings are contained in a study of sociology majors conducted by Engin Terwilliger, who conducted the study for the Policy Analysis Service of the American Council on Education.

European Book Imports

A graduate student in sociology is attempting to establish a service designed to facilitate your ability to acquire books published in Europe.

R. V. Heydebrandt said the service will include ordering books and providing information on books published in Europe, particularly in France, Italy and Germany.

In addition, a quarterly newsletter reports on new books and publishing programs in Europe will be available after March.

For further information on the service and newsletter write European Book Imports, P.O. Box 24260, University City, MO. 63132.

Comparison of Annual Meetings Shows Stability, Change

A review of an Annual Meeting held by sociologists in Canada gives some indications of the changes which have occurred in the meetings as well as the discipline in the past five decades.

In addition, the review points to those characteristics of the meetings and the discipline which appears to have lasting quality.

When sociologists met in Chicago in 1924, their collective was named the American Sociological Society and their meetings were held on a two and a half days, Monday through Wednesday noon. The meeting occurred during the Christmas holidays.

A total of 67 participants presented or discussed the 40 papers presented in the 12 sessions. No more than two sessions were scheduled simultaneously.

All sessions, except the business sessions, were open to the public, and most sessions were held in a single room—the Banquet Hall on the ninth floor of the Auditorium Hotel.

Business sessions were scheduled on the last two days of the last three days. Lunchtime conferences were also part of the program.

Sessions were presented by "sections" on social research, sociology of religion, rural sociology, family, educational sociology, teaching of social sciences in public schools and international relations. Sessions were also presented by "divisions" on biological factors, social psychology, and statistical sociology.

Program participants included Kimball Young, Ralph Linton, Pitirim Sorokin, F. S. Chaplin, Ellsworth Faris, Emory S. Bogardus, W. F. Ogburn and Floyd H. Allport.

The general theme of the meeting was "The End of Our Civility.

The meeting was jointly held with other groups. Consequently, the business sessions were given the first night of the meeting: "Insecurity" by Charles E. Ellwood, American Sociological Society; "Quantitative Analysis in Economic Theory" by Wesley C. Mitchell, American Economic Association; and "The Statistical and the Population Problem" by Louis J. Dublin, American Statistical Association.

The businesse of Chicago tendered a smoker after the addresses. Other officers of the society were Robert E. Park, first vice president; John L. Comstock second vice president, and Ernest W. Burgess, secretary-treasurer.

Although academic sociologists dominated the program, non-academic sociologists from the following organizations participated: Field Museum, Chicago; Scripps Foundation, Institute of Social Research, St. Louis; Federal Bureau, Bureau of Agricultural Economics; and Presbyterian Board Home Missions.

The Annual Dinner of the American Sociological Society was held in honor of Alphonse W. Smith and Franklin E. Giddings. Speakers were George E. Vincent and James P. Lichtenberg.

Room rates were as follows: rooms with both for one occupant, $4.00 and $6.00; for two occupants, $4.00 and $8.00 (double beds) and $8.00 (single beds) per day.

The City Club of Chicago extended to society members the courtesies and hospitality of its clubhouse which included a lounge, library and two dining rooms.

Similar courtesies and hospitality were extended to the women members of the society by the Garden Club and the Women's City Club.

Announcing the 1975 ASA Awards

Sorokin Award

The Sorokin Award will be presented in August 1975 to the author of a publicaion during the two preceding years which, in the opinion of the Selection Committee, makes an outstanding contribution to the progress of sociology. Publications of any kind (theoretical essay or empirical report, book or article) may be nominated as long as they are distinguished by their excellence. This award carries a stipend of $500.

Stouffer Award

An award created to honor the late Samuel A. Stouffer, 42nd President of the ASA, will be conferred in 1975 for a work or series of works published during the past five years, in which the opinions of the Selection Committee, has notably advanced the methodology of sociological research. This award carries a stipend of $500.

Dubois-Johnson-Frazier Award

An award created to honor the intellectual traditions and contributions of W.E. DuBois, Charles S. Johnson, and E. Franklin Frazier shall be made either to sociologists for an outstanding contribution in this tradition or to an academic institution for its work in assisting the development of scholarly efforts in the same tradition. If no individual or institution shall carry a stipend of $500 if made to an institution, it will consist of a commemorative plaque.

* * * * * * * * * * * * *

Members of the American Sociological Association or other interested persons are invited to submit nominations to the appropriate Selection Committee in care of the Executive Office, 1722 N Street, N.W., Washington, D.C. 20036. Please indicate for which award the recommendation is being made. Nominations for these awards must be received prior to April 1.

Guinean Professor Seeks Correspondent

A Guinean professor of sociology, Naima Mohamed Samoura, would like to correspond with American colleagues. However, since his knowledge of English is limited, he seeks a Professor in French to correspond with him.

To save on postage, mail may be sent to me for hand delivery to Mr. Samoura. My address is Dr. Merton L. Brand. P.A.O., American Ethnology CONAKRY, Department of State, Washington, D.C. 20520. Domestic postage (10¢) is used rather than foreign (24¢).

Merton L. Brand
Public Affairs Officer

Academic Job Market Report: Some Good News and Some Bad News

"The scientific manpower [sic] market is healthy once again" is Deborah Shapley's report in Science (May 31, 1974) of what science spokespersons are now saying. This evaluation is based largely on the newly National Research Council's survey of science and engineering PhD's which found an overall unemployment rate of only 1.2 percent, and it is conceivable that this figure is only "fractional unemployment," i.e., the percentage of the work force which is between jobs at any one time. The article goes on to discuss the warnings of some that severe shortages of PhD's could occur in the next few years because graduate enrollments have been declining on the whole but the demand for skilled manpower in certain fields is increasing. Of course the survey does not count unemployed people who have given up looking for employment or people who have accepted jobs below their capabilities, so the health of the job market may be more apparent than real.

With the overall PhD market appearing slightly bullish, what are the current signs for those in the PhD market? Over 90 percent of biology PhD's have found jobs, however, the race to find postdoc placements has made the going tough for many others. The National Research Council's survey of PhD's in 1974 found that 1.2 percent of all PhD's were unemployed.

The survey also notes that in the job market, the most significant trend is the decline in undergraduate sociology majors and course enrollments. The bullish tendencies in the general job market for science and engineering PhD's, cited at the beginning of this report, may not apply to sociologists. Since about 85 percent of sociologists are in academia, college enrollments and the distribution of students among departments are the major influences on the future employment of sociologists. On these matters the news is bad.

According to the National Center for Educational Statistics, national enrollment in colleges and universities increased only 5 percent between 1972-1973 which is less than the 7 percent projected. They estimate that the 1974 enrollment will be only about 6 percent above 1973, but sociology enrollments have been steeply in college enrollments. Enrollments in undergraduate introductory sociology and sociology majors declined 12 percent in the last year.

If the declines continue in sociology, college authorities are likely to see a decrease in sociology positions. Many universities which have declining enrollments are engaging in greater promotional efforts (see Chronicle of Higher Education, May 12, 1974). What are the sociology departments doing about declining enrollments? (FOOTNOTES would like to hear about successful actions).

Kurt Finsterbach
University of Maryland
OBITUARIES

Harold W. Saunders

Harold W. Saunders died September 5, 1974 at Tenipe, Arizona where he had made his home since retiring from the University of Iowa in 1972. Death was caused by a heart attack.
Professor Saunders was born in Mahaska County, Iowa, where he grew up on his parents’ farm. After four years as a high school teacher, first in Solon, Iowa and later in Perry, Iowa. In 1930 he became an instructor in sociology at the University of Iowa. He earned his doctorate in 1942 and remained at Iowa as a member of the faculty. He became the first chairman when an independent department of sociology was established in 1946, serving in that position until 1958. He was President of the Midwest Sociological Society in 1956 and subsequently was representative of the ASA for the Midwest Council on Social Research in 1963–64. He served as visiting professor at the University of Hawaii.

Professor Saunders’ principal interests were in the fields of population, gerontology, and medical sociology. He supervised the work of many students in these fields, was a long member of the Midwest Council on Social Research in Aging and served as a delegate to the White House Conference on Aging. In 1965, he won the George F. Miller Award for “Policies and Public Opinion.” As a sociologist, he was the author of numerous articles on population pressure, migration, and the aging population. Perhaps his greatest contribution to sociology is the continuous work of his students, in all parts of the United States, who remember him with gratitude and affection.

J. Richard Wilmer

Univ. of Iowa

SECTION NEWS

The ASA Section on the Sociology of Sex published its bidding papers for sections for the 1975 Annual Meeting Section Day Program:

1. Voting Class Women: Pamela Ryb, Kregge College, Santa Cruz, California 95064
2. What Do We Know About Sex Roles: Achen J. Theodore, Department of Sociology, Simmons College, Boston, Massachusetts 02115

The August issue of FOOTNOTES carried the announcement of rules governing the competition for the publication of submitted papers. The same rules apply to Section Programs.

ISSUE ON FAMILY MEDICINE Planned for Journal

The JOURNAL OF HEALTH AND SOCIAL BEHAVIOR is planning a special issue on the new specialty, Family Medicine. This notice is an invitation for submission of theoretical and empirical papers on topics such as family medicine as a profession, as a unique approach to medical care and practice, and as a response to consumer pressures and definitions. We would welcome papers which contribute to the growing conceptualization of discipline of Family Medicine.

Please send a copy of the manuscript to: Donald W. Melton, Editor, Dept. of Family Medicine, Box 5, Old Nurses Dorm, University of North Carolina, Chapel Hill, NC 27514. It will facilitate the selection of papers which are also sent to the following Guest Co-Editors: Marvin B. Sussman, Dept. of Sociology, Hayden Hall, Case Western Reserve University, Cleveland, OH 44106, and Pauline Bart, Dept. of Psychiatry, University of Illinois at Medical Center, 512 S. Wood Street, Chicago, IL 60602.

MEETING CALENDAR

April 28-29, 1975, Second Conference on Social Theory and the Arts, SUNY, Fredonia. The conference will deal with the relationship of art and society, with special stress placed on the use of art as a tool for the development of social knowledge. Contact Darrell Clear, Dept. of Sociology, SUNY, Fredonia, New York 14063 or Robert Lehtzing, Dept. of Sociology, SUNY, Oswego, New York 13126.

New Publications

NEWSLETTER OF THE SOCIETY FOR THE ADVANCEMENT OF SOCIAL PSYCHOLOGY

Free copies of the first issue of the newsletter are being mailed to members of the Society for the Advancement of Social Psychology. The newsletter contains teaching aids for social psychology courses, announcements of interest groups, abstracts of unpublished papers, and other material.

Women in Detention and statewide JAIL STANDARDs. Data on women in U.S. Jails and Prisons is a pamphlet being published by the American bar Association. The publication also reviews individual jail studies on female inmates and presents the current status of women’s rights to due process and due process standards applicable to female residents. For further information, contact Joan Bollman, 1720 Delavalle St., NW, Washington, DC 20036.

Training in Genetics Available This Summer

Applications are being accepted from advanced graduate students and postdoctoral scholars in the social sciences for a summer training program in the genetics of developmental processes. Application deadline for the institute which will be held June 16 to August 1 at the University of Utah is February 28.

Application forms and further information is available from Dr. Gerald E. Mc- Clelland, Utah Institute for Reproductive Genetics, Univ. of Colorado, Boulder, Col. 80302. Sponsored by the Social Science Research Council and supported by a NIH grant, the program is designed to provide a conceptual framework of genetics for 10 advanced graduate students and 10 postdoctoral scholars whose primary interest is in the social behavior and environment of the individual.

Stipends will be available in the amount of $1,500 for each student for postdoctoral scholars Travel expenses will be provided up to an equivalent of round-trip coach air fare.

ASA FOOTNOTES

Published monthly except June, July, and September. Distributed to all members of the American Sociological Association by mail and to nonmembers by subscription: $10; single copy: $1.00.
Editor: Donald L. Anderson
Assoc. Editors: Alice F. Bedell, Joan R. Harris
Advertising Manager: Sue Gorman

Competition Seeks Student Papers

Graduate and undergraduate students in sociology are invited to submit an entry by February 1 to the Annual Student Paper Competition sponsored by the American Assn. for Public Opinion Research.

Papers may relate to methodological questions in the field of survey research, and should present substantive findings in a study which advances our understanding of public opinion and social behavior. Well executed papers, special project reports are all acceptable for the competition.

A $200 prize will be awarded to the winning paper and its author will be invited to present the paper at the 1975 Annual Assn. for Public Opinion Research Conference, Chicago, IL, May 29-June 1. Honorable mention papers will also be considered for presentation at the conference.

Winning and honorable mention papers will be considered for publication in their entirety in PUBLIC OPINION QUARTERLY.

A panel of judges composed of James A. Druckman, S. Elliott, Nelson N. Foot, Charles Y. Clock and Harold Mendelssohn will evaluate the papers.

To enter, three copies of a 10-20 page paper must be sent to: Assistant to the President, 1101 East 60th Street, Chicago, IL 60637. The winner will be announced in February 1975.

PHOTOGRAPHS WANTED FOR TRAVELING EXHIBIT

Sociologists are invited to submit photographs for use in an exhibit which will travel around the county for two years. The exhibit which will initially be shown at the Rockefeller Fine Arts Gallery, SUNY Fredonia, April 13 to May 7 will be entitled "The Human Image: Sociology and Photography."

Several sociologists have already accepted invitations to display their work including Howard S. Becker, Alfred C. Clarke, Eric Goode, Bruce Jackson, May-stocos and Richard Quinney.

All photographs must be submitted with the photographer’s work. The procedure for submission will be the same as exists generally for papers, with prints and slides required for evaluation. The final mounted photographs will be due a month before the exhibit opens.

For further information contact Derral Chestnutt, Dept. of Sociology, SUNY Fredonia, Fredonia, N.Y. 14063.

Media Internships Offered by AAAS

Ten advanced graduate students in the social and natural sciences have an opportunity to serve as intern reporters, receiving full-time production assistants in the mass media next summer under an AAAS sponsored program. The one-month training in the media is intended to provide an opportunity for the students to improve their communication skills and increase their understanding of the editorial process in a daily newspaper that underlies the dissemination of information about public affairs.

Applications for receipt of completed applications is February 1. For further information contact Wendy Weissman-Deemer, Mass Media Intern Program, American Assn. for the Advancement of Science, 1776 Massachusetts Ave., N.W., Washington, D.C. 20002. Her phone number is 202/326-4214.

PROBLEMS OF THE DISCIPLINE

A Feb. 1 deadline has been set for submission of proposals by small groups of sociologists to the expanded small grants program which is funded by the ASA to study problems of the discipline. See the November FOOTNOTES for further information on the grants.

New Programs

The Oxford Summer Seminar will include two courses for sociology undergraduates (and graduate students) in its 1975 curriculum at Trinity College, Oxford, England. Both, "The Nature of Science" and "The Sociology of British Education," will be taught by Prof. A. H. Halsey in conjunction with other members of the Oxford sociology faculty. These small seminars are six-week courses of intensive study with appropriate field trips and research projects. They are available for full credit through the Department of Sociology at the student’s home institution, which serves as the sponsoring institution but welcomes students from any other American college or university. The seminars will begin the week of June 15, and the fee is $1,020. Further information and application forms, write Prof. A. H. Halsey, Director, Oxford Summer Sem- inar, Balliol Hall, University of Massachusetts, Amherst MA 01002. The deadline for final applications is March 5, 1975.

Graduate Program in Community Mental Health Specialists, Tulane University, School of Public Health and Tropical Medicine offers a Community Mental Health Specialist program for psychiatrists, psychologists, social workers, sociologists, clergyman, counselors and other baccalaureate level professionals with related work experience. A Master of Science in Hygiene degree is considered a one-year program of study. Applications are now being considered for the Fall 1975 entry. Further information is available. For further information write to: Dr. Edward C. Norman, Director, Graduate Program in Community Mental Health, School of Public Health and Tropical Medicine, 1340 Tulane Avenue, New Orleans, Louisiana 70112.

AWARDS & GRANTS

University of Miami, Department of Psychology. Social Science in the Division of Addiction Sciences has recently received a three year grant (from NIDA) for $616,000 to establish a center for theoretical social research on drug abuse. Robert W. Woodruff is the principal investigator, Clyde R. McDonough, is the associate director, and Duane C. McAdooe is the associate project director. Within the center, Patricia Clark will direct community studies on drug abuse.

Joseph Smigel Award. As a result of a bequest from the late Professor Erwin Smigel, a fund has been created to provide the "Joseph O. Smigel, M.D. Annual Award for the Best Graduate Paper (at New York University) on Medical Sociology or Professional Occupation." Any person wishing to contribute to this fund should write to: Mr. C. O'Sullivan, c/o Treasurer's Office, New York Univer., NY 10011, New York (N.Y. 1975).

People

Matthew White Riley has joined the Russell Sage Foundation as a part-time staff member with major responsibility for developing a research program on Age and Society.
from $11.400 to $14.400 depending upon experi-
ence and qualifications. Applicants must have a B.A. degree and at least one year of experi-
ence as a research assistant in social psychology. The position is available immediately.

University of South Carolina. Assistant Professor or Full Professor of Psychology, tenure-
track, in the Department of Psychology. This is a full-time position. Salary is negotiable.

University of Wisconsin-Madison. Assistant Professor in the Department of Psychology.
The position is available immediately. Salary is negotiable.

University of Wisconsin-Milwaukee. Associate Professor, tenure-track, in the Department of Psychology. The position is available immediately. Salary is negotiable.

University of Wyoming. Assistant Professor, tenure-track, in the Department of Psychology. The position is available immediately. Salary is negotiable.

University of Alabama. Assistant Professor, tenure-track, in the Department of Psychology. The position is available immediately. Salary is negotiable.

University of Colorado at Boulder. Assistant Professor, tenure-track, in the Department of Psychology. The position is available immediately. Salary is negotiable.

University of Southern California. Assistant Professor, tenure-track, in the Department of Psychology. The position is available immediately. Salary is negotiable.

University of Oregon. Assistant Professor, tenure-track, in the Department of Psychology. The position is available immediately. Salary is negotiable.

University of Pennsylvania. Assistant Professor, tenure-track, in the Department of Psychology. The position is available immediately. Salary is negotiable.

University of Illinois at Urbana-Champaign. Assistant Professor, tenure-track, in the Department of Psychology. The position is available immediately. Salary is negotiable.

University of Florida. Assistant Professor, tenure-track, in the Department of Psychology. The position is available immediately. Salary is negotiable.

University of Kentucky. Assistant Professor, tenure-track, in the Department of Psychology. The position is available immediately. Salary is negotiable.

University of Kansas. Assistant Professor, tenure-track, in the Department of Psychology. The position is available immediately. Salary is negotiable.

University of Michigan. Assistant Professor, tenure-track, in the Department of Psychology. The position is available immediately. Salary is negotiable.

University of Minnesota. Assistant Professor, tenure-track, in the Department of Psychology. The position is available immediately. Salary is negotiable.

University of Missouri. Assistant Professor, tenure-track, in the Department of Psychology. The position is available immediately. Salary is negotiable.

University of Nebraska-Lincoln. Assistant Professor, tenure-track, in the Department of Psychology. The position is available immediately. Salary is negotiable.

University of North Carolina at Chapel Hill. Assistant Professor, tenure-track, in the Department of Psychology. The position is available immediately. Salary is negotiable.
